Art Unit: 1754

Claim 62 is objected to because of the following informalities: "imultaneously" is misspelled. Appropriate correction is required.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 57,64,74 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The instant specification is nonenabled to one skilled in the art as to what is meant by "di,tridecyl amine." It appears that --ditridecyl amine-- was intended.

Claims 55-78 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 55, b, "at an pressure" is ungrammatical.

In claim 55, h, "ammonium dimolybdate" is indefinite as to where this came from or how it could be formed since nowhere in the recited process is an ammonium compound used.

Art Unit: 1754

In claims 55,62,71,72, "suitable as a chemical grade product" is indefinite and appears to be superfluous.

In claims 59-61,66-68,76-78 are indefinite as there is not proper antecedent basis for each recitation of "step".

In claims 57,64,74, are indefinite as to what is meant by "di, tridecyl amine." It appears that --ditridecyl amine-- was intended.

In claims 55,62,72, "simultaneously reducing the pH level" is indefinite as to what it is simultaneous with.

In claim 72, g, "ammonium dimolybdate" is indefinite as to where this came from or how it could be formed since nowhere in the recited process is an ammonium compound used.

Applicant's arguments filed March 19, 2003 have been fully considered.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR

Art Unit: 1754

1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
